

## Pro Harvest Benefits

### Higher Incomes

Food security - Extended shelf life by arresting aflatoxin growth

Higher yield value - Maintains high germination rate of seeds

### Cost Effective

Replaces glass jars, metal tins/foils

Eliminate the need for preservatives, fumigants & cold storage

**Excellent Gas Barrier** - Barrier against oxygen, nitrogen, carbon dioxide, and other gases

**Food Preservation** - Locks aroma, maintains freshness and retains the taste of the product

**Certified for Food Contact** - Raw material is FDA certified

**Recyclable** - Contributes less to landfill

**Shipping Friendly** - Weighs 20% lighter than its counterparts, making it economical to transport

## Pro Harvest Hermetic Packaging

Pro Harvest is a premium High-Barrier Multi Layer Hermetic packaging brand in India

Hermetic storage is a process by which Oxygen is depleted and replaced by CO<sub>2</sub> thus controlling pests and insects without the use of pesticides or fumigants.

Pro Harvest provides packaging that is a perfect-fit for your products and continuously innovates the product range to suit the requirements of customers.

## Why Pro Harvest

Pro Harvest provides ultra high barrier packaging and storage solution by creating an anaerobic environment for the storage of Agri and Agro produce and results in:

- High Gas and Moisture Barrier
- Impervious to bacteria, fungus, mould and external atmospheric contamination
- Safe from infestation: storing organically without the use of toxic fumigants
- Preserves aroma, color, freshness and taste.

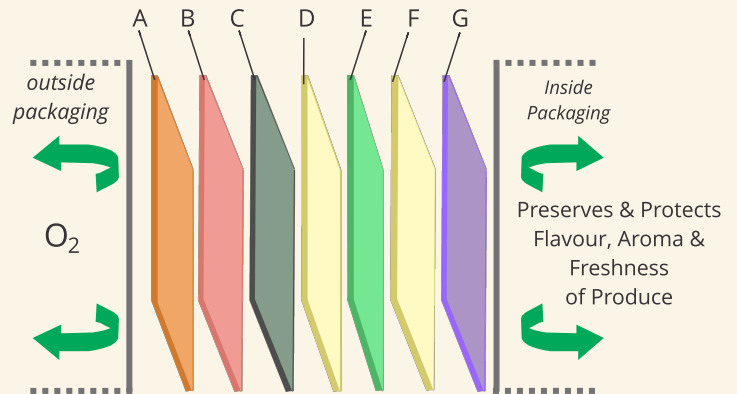

## Pro Harvest Security Technology

Pro Harvest incorporates a multi-layer structure for superior barrier against gases, moisture and external atmospheric contamination.

Insecticide or Fumigation is not necessary.

### Multi-Layer Structure

## Pro Harvest Application
